## Past Performance

### **DHA Facility Logistics Support Services (W912DY23C0002): April 2021 - Present**

Sentry Solutions delivers enterprise-level program management and technical support to DHA's DMLSS program, such as deploying Database Sustainment Specialists (DSS) across 400+ Medical Treatment and Research Facilities nationwide. Supporting one of DHA's largest and most complex programs, our team manages facility and equipment data, maintains system-of-record accuracy, and enables logistics and infrastructure operations across a 65M+ square foot portfolio. Through disciplined data governance, workflow management, and enterprise coordination, Sentry drives measurable improvements in data integrity, reporting efficiency, and facility visibility. Our scalable staffing model and quality control processes ensure high personnel retention, rapid onboarding, and consistent, mission-ready support across the Military Health System. (Previously W912DY21C0025)

### **DHA-FE RPIE & OMPR Support Services (W912DY24D0004): July 2024 - Present**

Sentry Solutions delivers end-to-end Real Property Installed Equipment (RPIE) validation and quality assurance support to DHA-FE across CONUS/OCONUS locations, including staffing, management, and execution of OMPRs and independent QARs. Our team validates equipment inventories, reconciles field conditions with DMLSS data, and ensures accurate asset classification and documentation in accordance with federal standards. To date, Sentry has supported over 4.37M SF of RPIE validation and 876K SF of quality reviews, strengthening data accuracy, audit readiness, and lifecycle asset management across DHA facilities.

### **DHA OCONUS DMLSS Support Services (W912DY21F0327): August 2021 - June 2024**

Providing database management, technical, and administrative support to DHA's DMLSS program, enabling facilities logistics operations across overseas Medical Treatment Facilities in Hawaii and Guam.

### **Ft. Hood RPIE DMLSS Data Entry: April 2021 - August 2021**

Performed DMLSS data entry and validation for 52,000+ RPIE assets across Darnall Army Medical Center and Ft. Hood facilities, ensuring full compliance with Real Property Systems Standards through rigorous quality assurance and data accuracy controls.
