Past Performance

DHA OCONUS DMLSS/LogiCole Facility Management Support Services (W912DY-26-F-A130; prior W912DY-21-F-0327): June 2026 - Present; August 2021 – June 2024

Sentry provides technical, administrative, program management, project management, training/access coordination, database sustainment, analytics, reporting, and operational support for DHA's DMLSS/LogiCole Facility Management program across OCONUS Medical Treatment Facilities and Medical Research Facilities. Sentry currently supports personnel in Hawaii, Japan, South Korea, and Guam, building on prior OCONUS support in Hawaii and Guam. Our team includes administrative support personnel, DMLSS AOR Managers, Facility Operations Specialists, and onsite Database Sustainment Specialists who help maintain accurate facility data for sustainment, lifecycle management, compliance, space management, work requests, maintenance tracking, and capital planning. This effort demonstrates our ability to manage a geographically dispersed, mission-critical workforce across overseas military healthcare environments while maintaining data integrity, reporting discipline, and operational continuity.

DHA-FE RPIE & OMPR Support Services (W912DY-24-D-0004): July 2024 – Present

Sentry delivers end-to-end Real Property Installed Equipment (RPIE) validation, data sustainment, and quality assurance support to DHA-FE across CONUS and OCONUS locations. Our team supports staffing, management, field execution, OMPRs, and independent Quality Assurance Reviews (QARs), validating equipment inventories and reconciling field conditions against DMLSS/LogiCole data. To date, we have supported more than 4.37M SF of RPIE validation and 876K SF of quality reviews, improving asset data accuracy, audit readiness, lifecycle planning, and facility visibility across DHA MTFs.

DHA CONUS DMLSS/LogiCole Facility Management Support Services (W912DY23-C-0002; prior W912DY-21-C-0025): April 2021 - Present

Sentry provides enterprise-level program management, technical support, and Database Sustainment Specialist (DSS) staffing for DHA's DMLSS/LogiCole Facility Management program across 400+ Medical Treatment and Research Facilities nationwide. Supporting one of DHA's largest facility logistics data programs, our team maintains system-of-record accuracy, manages facility and equipment data, supports workflow and reporting requirements, and enables logistics and infrastructure operations across a 65M+ SF healthcare facility portfolio. Through disciplined data governance, quality control, rapid onboarding, and enterprise coordination, Sentry strengthens data integrity, reporting efficiency, and facility visibility across the MHS.

Ft. Hood RPIE DMLSS Data Entry: April 2021 – August 2021

Performed DMLSS data entry and validation for 52,000+ RPIE assets across Darnall Army Medical Center and Ft. Hood facilities, ensuring full compliance with Real Property Systems Standards through rigorous quality assurance and data accuracy controls.
